Despite being underutilized, my project proposes to enhance local tourism by integrating the principles of biophilic architecture, thus creating harmony between the natural environment and tourist structures.

Résumé

Le présent mémoire explore le potentiel touristique de la région d'Iraguen à Jijel, en Algérie, en mettant en lumière ses atouts naturels, notamment un barrage et des panoramas exceptionnels. Bien que cette zone demeure sous-exploitée, mon projet propose de valoriser le tourisme local en intégrant les principes de l'architecture biophilique, créant ainsi une harmonie entre l'environnement naturel et les structures touristiques.
