SPECIALITY : Pharmaceutical Chemistry

Recovery of Used Oils

Topic

Presented by: Hamdi Sarra
Rebai Aya

Supervised by: Dr. MADANI Salim

Date of presentation: 04/07/2024

Examination jury

President	BENABID Samira	MCB	University- Ferhat ABBAS Sétif 1
Examiner	HAMZA Djamel	MCA	University- Ferhat ABBAS Sétif 1
Supervisor	MADANI Salim	MCA	University- Ferhat ABBAS Sétif 1

Class of : 2023/2024

Résumé:

We conducted an in-depth study on used oils and their environmental impact, proposing Solutions to mitigate their negative effects. We conducted several scientific protocols in the Laboratory and produced environmentally friendly natural products, whose efficacy we confirmed through physicochemical analyses. We concluded that these are high-quality products. The method of valorizing used oils can be considered as a profitable project for producing and marketing environmentally friendly products. Thus, we have provided an effective solution for the environment while achieving economic benefit

---

Nous avons mené une étude approfondie sur les huiles usagée set leur impact environ-Nemental , en proposant des solutions pour atténuer leurs effets néfastes. Nous avons réalisé plusieurs protocoles scientifiques en laboratoire et produit des matériaux écologiques, dont L'efficacité a été confirmée par des analyses physico-chimiques. Nous avons conclu qu'ils 'a git de produits de qualité. La méthode de valorisation des huiles peut être envisagée comme un projet rentable pour la production et la commercialisation de produits respectueux de L'environnement. Ainsi, nous avons offert une solution efficace pour l'environnement tout en réalisant un bénéfice économique

General introduction 13

I Literature Review of used motor oil 15

I.1 Introduction 16
I.2 Used Oil 18
I.3 Lubricating Oil 19
I.4 The Degradation of Motor Oils 25
I.5 Environmental, Health, and Economic Consequences of Non-Recovery of Used Oils 27
I.6 The importance of managing used oils: 30
I.7 Conclusion 31

II Literature Review of used cooking oil 32

II.1 Introduction 33
II.2 Vegetable oils 33
II.3 Cooking Oils 33
II.4 Used Frying Oils and Cooking Oils 34
II.5 Risks of Used Frying Oils: 37
II.6 Management of Used Cooking Oils 39
II.7 Domain of Lipochimie 40
II.8 Soap and Synthetic Detergents 42
II.9 conclusion 46

III Expérimental section 47

III.1 Introduction 48
III.2 operating procedure 52
III.3 Physicochemical Analysis 65
III.4 Note 71
III.5 conclusion 71

IV Resultsanddiscussion 72

IV.1 Introduction 73

IV.2 characterisation of used oils 73
IV.3 tests for soap 74

IV.4 test for glycerol 78
IV.5 test of grease 81
IV.6 test of detergent ISIS 82
IV.7 conclusion 83

V Start up **84**
V.1 Introduction 85
V.2 Presentation of the Idea and Company Objective 85
V.3 The reasons for choosing this idea are as follows: 85
V.4 Name and Logo 86
V.5 Financial Plan 87
V.6 Proposed Values 89
V.7 tableau 99

General Conclusion **100**

Abstract **105**
